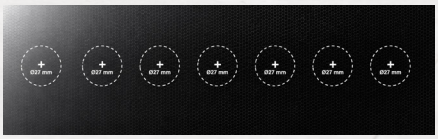
PRODUCT DATA SHEET
POWERSHARK HEAVY DUTY UNIVERSAL BATTERY BOX

CUT-OUT GUIDE INCLUDED

Takes the guesswork out of accessory installation.

7 × Ø27 mm marked positions for accurate spacing and neat, professional cut-outs.



Features:

- Unique solid blank lid — customise outlets to suit your installation
- Heavy-duty 3.7 mm ABS construction
- Fit cable glands for a clean, professional cable finish
- Cut-out sticker with seven 27 mm accessory positions
- Secure four-bolt lid and internal battery strap
- Integrated handles for carrying and tie-down

Description:

Exclusively developed by Whitevision Australia, the PowerShark Heavy Duty Universal Battery Box (WVBBX10) puts you in control of the finished installation. Its innovative solid blank lid has no pre-fitted outlets, giving OEMs, trade professionals and end users the freedom to create a battery box tailored to their needs.

Built for a professional finish. The heavy-duty 3.7 mm ABS construction provides a robust foundation for custom installations. OEM and trade installers can fit cable glands to suit their cable runs, creating a clean, neatly finished result.

Your box. Your configuration. For end users, the included cut-out sticker marks seven 27 mm accessory positions, making accurate spacing and clean cut-outs easier. Add the accessories you need, where they work best. A secure four-bolt lid, internal battery strap and carry/tie-down handles complete a versatile enclosure built around your application.
