

CRL210 SERIES COMBINATION LIGHTS

**NEW
TWIN PACK
BLISTERS**

Features:

- Multifunction with dynamic indicator
- Compact and stylish
- 9-33V
- Durable construction
- DT connector option

Description:

The CRL210 Series Combination Lamps from Whitevision offer a modern, compact, and durable lighting solution for a wide range of rear lighting applications. Combining functionality with sleek design, these lamps feature stop/tail, dynamic indicator, and optional reverse functions. Measuring just 210mm in length, the CRL210 is surface mounted with ease while maintaining a stylish, low-profile appearance once installed.

Designed to suit a wide voltage range (9–33V), they are compatible with most vehicles from small trailers to larger RVs or utes. The reverse model includes Whitevision's DT connector, allowing for fast, plug-and-play installation using Ezy Patch Kits. With an IP67 weatherproof rating and durable polycarbonate lens, the CRL210 is built to perform and endure in tough conditions.
