

## PRODUCT DATA SHEET

### CRL330LED REAR COMBINATION UNIVERSAL FIT BLISTER

**NEW**

#### Features:

- Universal fit left hand or right hand
- 9 - 33 Volt DC integrated circuitry
- Horizontal top or back screw mounting
- Retrofits same style lamp series
- Fully ADR compliant

#### Description:

The new CRL330 Series are designed as a direct replacement for original equipment incandescent rear combination found on Hino and other Japanese styled trucks. The CRL330 Series is made for heavy duty use which features a high impact acrylic lens and strong ABS Base, and is suited to OEM and commercial vehicle applications. Perfect for upgrading existing incandescent lamps to LEDs. The new blister packs are a single part number. Modules can easily be swapped to match left hand or right hand applications before installation.
