

## 128 SERIES MARKERS

### Features:

- Halotrack™ Illumination Technology
- Integrated Reflector Design
- Versatile Applications
- Easy Surface Mounting
- Durable Design

### Description:

The Whitevision 128 Series LED Marker Lights combine sleek modern styling with advanced illumination technology for superior visibility and design consistency. Featuring Halotrack™ illumination, these slimline markers deliver a precise, uniform glow — bright enough for safety yet refined for visual appeal. Each model integrates a compliant reflector for a convenient two-in-one lighting and reflective solution, enhancing both function and compliance. Available in front clearance, rear clearance, side marker, and supplementary direction indicator configurations, the 128 Series perfectly complements other Whitevision Halotrack™ signal lights, creating a cohesive and professional vehicle lighting system. Designed for long-term reliability, each unit operates on 9–33V DC and is fully sealed to IP67, ensuring performance in even the toughest conditions — from caravans to heavy trucks.
