

PRODUCT DATA SHEET LED GRAB HANDLE

Features:

- Stylish ergonomic with exclusive lens design
- Tough, durable powder coated metal alloy housing
- Easy push button control
- Soft blue night light
- Control wire for external switching

Description:

The LGH220 Grab handle is the premium model in the Whitevision flush fit series. Constructed of powder coated metal alloy this grab handle is built strong and sturdy for both recreational and industrial exterior applications. Featuring exclusively aesthetically designed exterior, with integrated switchable LED lights. The main light emits a 150lm diffused white light and soft blue backlit illumination for the grab handle when in night mode.

The modes can be easily selected by the conveniently mounted water proof switch on the front making it a great illumination and accessibility aid. The main light can also be switched externally if required. The LGH220 will perfectly retrofit older lights of the same style making it great for repair or replacement. It is also suited to OEM applications where quality and appealing designed grab handle is essential.
