

## POWERSHARK BATTERY BOX

### Features:

- Versatile Power Hub
- Comprehensive Output Options
- Durable Construction
- Digital Voltmeter
- Adventure Ready Design

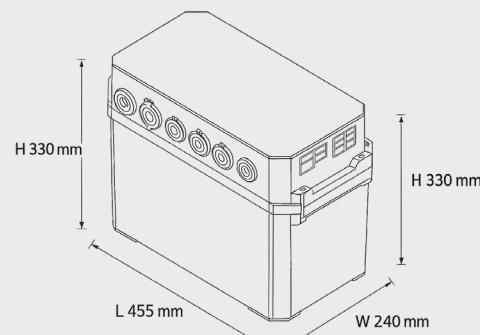

### Description:

The Whitevision PowerShark Battery Box is a rugged, all-in-one portable power station designed to transform a wide variety of batteries into a reliable 12V power hub. Built from tough ABS plastic with a securely fastened screw-on lid, it's engineered for durability and mobility in outdoor, recreational, and worksite environments. The PowerShark is equipped with a full suite of outputs, including dual 12V accessory sockets, USB and PD fast-charging ports, four 50A Anderson outlets, and a 175A high-current outlet for jump-starting.

A digital voltmeter and master on/off switch provide clear control and monitoring, while heavy-duty handles make transport safe and easy. Compatible with AGM, Deep Cycle, and Lithium batteries, the PowerShark supports a maximum internal battery size of 340mm (L) x 185mm (W) x 235mm (H) — making it the ideal foundation for building a dependable 12 volt power system.

### Specifications:

Voltage:	12 Volt
Ports:	4 x 50A Anderson 1 x 175A Anderson 2 x 12V 10 Acc 2 x USB3+PD45W
Monitoring	Voltmeter with touch on / off
Housing:	ABS
Compatible Batteries:	AGM/Lithium
Max Battery Size:	340mm (L) x 185mm (W) x 235mm (H)

### Parts List

WVPSBBX10	12 Volt Battery Power Box Suits AGM / Lithium
